

ATG Access – The Bollard People

Edgar Allen – Manganese Range

ATG Access holds the exclusive sales and marketing rights of the entire manganese bollard range of Edgar Allen Ltd.

This not only gives ATG Access the exclusive worldwide rights to sell the range but the flexibility to offer its clients a complete range of perimeter protection for all levels of security.

The bollards encompassed by this agreement are:

- The Westminster
- The Excalibur 90
- The Excalibur 125

Coming soon - The London City Bollard.

ATG Access Ltd is one of the world's largest manufacturers of access control and anti-terrorist vehicle barrier systems. We have a comprehensive product range of fixed, automatic and manually operated bollard systems. These products all come with internationally recognised impact certification and quality standards.

ATG Access prides itself on being a solutions provider; we are an engineering company which manufactures bollards and bollard systems for a wide range of applications. The bollard marketplace has matured in recent times as companies such as ATG Access move into the bracket of "Specialist Suppliers" and clients expect more and more support and project management services.

We are in the enviable position of being able to offer you first class engineering back up and project management as well as the finest products around.

Our quality system is ISO 9001:2008 accredited, we are Construction Line and Safe Contractor certified, our products are UK Highways Agency approved and tested to Sold Secure standards; we are also part of the UK PAS68 and US ASTM & DOS testing programmes.

Our Products

Westminster

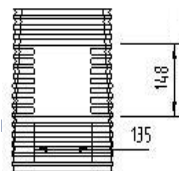

Elegant and unyielding the Westminster bollard was primarily designed for Westminster City Council; however it would suit any architectural situation where style and high security is a priority.

The bollard is contemporarily styled with an encompassing ribbed profile and peaked top. Within the front fascia there is a specifically designed section to enable a corporate logo to be added; the insignia of a local authority or government.

Manufactured from micro structurally engineered steel, of high impact toughness, the bollard has the ability to absorb massive amounts of energy without fracturing.

Exclusively to ATG Access the Westminster bollard is available with our shallow mount system which requires as little as 112mm foundation depth.

BSI PAS:68 2007 Test Rating – 7500kg vehicle @ 80kph

Excalibur

Unique in its design and versatility the Excalibur bollard provides a low cost solution to guaranteed stopping results against vehicular borne threat. It can be sheathed (if required) by a more aesthetically pleasing cover that's manufactured from any material and to almost any design so that it keeps in line with its surrounding architectural styles.

The bollard itself functions as a super-strong slim core which has the ability to absorb massive amounts of energy without fracturing.

In addition, Excalibur's™ unique shallow-depth substructure design means that it can be installed into the ground with minimal disruption to services offering substantial cost savings.

Available in diameters of either 90mm or 125mm the Excalibur offers a choice of design and level of security.

Excalibur 125 BSI PAS:68 2007 Test Rating – 3500kg vehicle @ 48kph

Excalibur 90 BSI PAS:68 2007 Test Rating – 1500kg vehicle @ 48kph
