# ATG Access SP 400 'Independence'

The SP400 'Independence' is a drill operated, manual bollard. Its innovative nature means it's one of the only products of its kind available in the market at the moment.

The SP400 'Independence' is part of the ultimate security bollard family. This product is designed to protect at the PAS68 / K4 level of fully laden 7.5 tonne at 40mph.

Whilst still remaining an aesthetically pleasing product the SP400 'Independence' bollard benefits from quirky engineering, eliminating the problem of no power supply and remote applications still needing retractable bollards for access control.

The ATG Access SP400 'Independence' is a manually retractable bollard ideal for use on remote applications with no power available to control automated products.

The bollard may be raised and lowered by inserting a square socket tool into the chuck of a battery operated drill. The shaft is accessible by removing a small, pear shaped cover fitted into the bollard lid. In the absence of a battery operated drill, a hand operated brace type device can be used.

*The SP400 'Independence' bollard – picture shows the operating socket on the head of the bollard. This is then covered by a cover.*

## Characteristics

Product	Diameter	Height	Wall thickness	Finish	Foundation Depth
SP 400 'Independence'	203mm in black	1000 mm	Confidential	Sherardised black finish	1700mm  (Standard Installation depth is 2200mm inc. ground cover)

## Technical Specifications

Testing Criteria:	BSI PAS 68 : 2010
Vehicle weight:	7.500kg
Vehicle speed:	64km/h (40mph)
Full PAS 68 Designation:	V7500(N2) 64/2.3/2.7
203mm Diameter on Sherardised finish.	

## The Benefits

- Impact tested in accordance with BSI PAS 68:2010, and equivalent to ASTM (DOS) K8 tested
- Modular design makes service and maintenance especially straightforward
- Full installation service or supply only
- Matching static, lift-out, manually retractable, and automatic bollards
- Manufactured in the UK
- No power supply needed to operate

## Optional Extras

- The option is available for a lockable cover to protect the retractable mechanism from being accessed by unauthorised personnel. This lock is designed to be ultra secure and has been tested to 'Gold' level by Sold Secure.

We can produce a written evaluation, in the form of a quotation, and provide drawings or photographs based on your requirements.
