

ATG ACCESS

# ATG Access Streetscape Bollard

**The ATG Streetscape Bollard is a lightweight, shallow mount, lift-out bollard. It is 141mm in diameter and 1100mm high above ground.**

## The Product

This product is designed for urban applications where aesthetic values and pedestrian permeability are of paramount importance. As well as the products attractive aesthetics, the bollard only requires a shallow foundation depth - 150mm which minimises the disruption caused to street scenes when installing access control measures and limits service interference.

Two options are available when choosing this product, a removable bolt-down version or a removable, padlock-able version dependant on the application needing protection.

## The Application

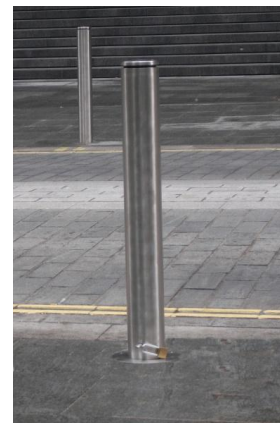

The Streetscape bollard is ideal for urban applications where aesthetics are of a primary concern. This product is ideally suited to sites where there are few traffic movements. Users with high traffic volume will benefit from our range of automatic or retractable bollards.

## Characteristics

Product	Diameter	Height	Wall thickness	Finish	Foundation Depth
