

# Edgar Allen Range

## Westminster

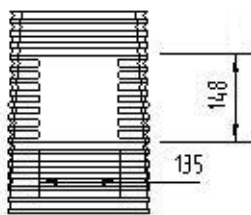

The Westminster is one of four bollards from our Edgar Allen range

Elegant and unyielding the Westminster bollard was primarily designed for Westminster City Council; however it would suit any architectural situation where style and high security is a priority.

The bollard is contemporarily styled and incorporates ribbed profile and peaked top.

Within the front facia there is a specifically designed section to enable a corporate logo to be inserted.

The Westminster is one of four bollards from our Edgar Allen range; each has passed a high-level test rating within BSI PAS 68:2008 (specification for vehicle security barriers)

The Bollard is manufactured from micro structurally engineered steel, of high impact toughness which has the ability to absorb massive amounts of energy without fracturing.

ATG Access Ltd is a world leader within the access control and security industry, we are able to offer expert project management and engineering details of a standard foundation to suit this type of bollard, details can be found within BSI PAS 68:2008.

Exclusively to ATG Access the Westminster bollard is available with our shallow mount system which requires as little as 112mm foundation depth.

ATG ACCESS LTD

# Edgar Allen Range of Bollards

Product	British Rating	Vehicle Weight (tonne)	Vehicle Speed (kph)	Product Height/ Diameter (mm)
Westminster Single	PAS68	7.5	64	1065/220
