

# ATG Access Ltd

## Case Study

### GloBoll™: Vehicle access control for a residential site

**Location:** Cheshire, England

**Brief:** To integrate security bollards with automatic gate.

**Solution:** GloBoll™ dual bollard system with key fob operation and integration with existing gates.

ATG Access bollards were installed as part of a complete overhaul and re-surface of the driveway.

Two stainless steel GloBoll™ bollards were installed to protect the existing gate and offer added security to the property.

Operated via key fob and in conjunction with the automatic gates these imposing and yet aesthetically pleasing bollards provided added reassurance and value to the property.

The civil installation included utilising existing cobbles from the old surface to provide an attractive mounting area for the bollards.
