

ATG Access Ltd

ATG Access Ltd. successfully completed a project in Bahrain to secure the American School (DODD) in Manama.

The various high end decision makers have their children in this school. Bahrain has a strong American community due to its geographical and political location situation. There had then been a natural need for Top High Security solution allowing the multiple entries around the School.

32x K12 Automatic Bollards divided into several sets provide a high security solution around the building. The Emergency Fast Operation (EFO) system is required in case of an attack. Bollards were fitted with SS Sleeve for aesthetic to match the prestigious site.

ATG Access Ltd. has worked in parallel with our own sister company in Lillington – USA (ATG Access Inc.) to provide the TITAN bollards - perfect solution for multiple zones - and number of bollards controlled with single HPU (Hydraulic Power Unit).

The collaboration between ATG Access Ltd, our Exclusive local partner – Secure Services - was crucial. This reference will undoubtedly lead to further work in the region.

Despite a growing competitive landscape, ATG reaffirms its ability to deliver larger and more prestigious project worldwide as evidenced by the recent acquisition in of the vehicle barrier/gate division of Canadian group Allen Vanguard Corporation.

Case Study

Anti-Terrorist Perimeter Security

Location: American School, Manama - Bahrain

Brief: To provide a high security vehicle barrier around the perimeter of the site with K12 Automatic bollards.

Solution: TITAN K12 Automatic retractable bollard with EFO (Emergency Fast Operation)
