

# ATG Access Ltd

## Case Study

### Automatic Rising Bollards

**Location:** Eltham College - London

**Brief:** Access control for the college and the YMCA Building

**Solution:** ATG Access VP200 Automatic bollards

The ATG Access VP200 automatic bollards are built to the highest quality standards and are the perfect solution for access control.

Access control was required for Eltham College and the adjoining YMCA building. ATG Access supplied and installed two separate automatic bollard systems both linked via an intercom which was hard wired to the main reception.

Both installations were fitted with a time clock which allows the bollards to be automatically lowered twice a day: opening and closing times. When required the bollard system can also be operated via a linked telephone system.
